Isinya staff housing is cleaning of common areas and ground maintenance. The compound is approximately 2.5 acres developed with 30 staff houses <p>We do not have measurements for substations and that’s why the site visit for Suswa was mandatory. Sanitary bins are specified in the tender document.</p>

2	<p>You only mentioned site visits dates for Suswa and KAWI house. Can we make site visits to other areas especially sub stations and who will sign for us? Can we visit only 1 sub-station and submit 1 site visit certificate</p>	<p>KETRACO has substations all over the country, it would therefore cost much in terms of money and time to visit all the substations.</p> <p>All substations are similar in design and outlay, as such, we have chosen Suswa substation which is one of our biggest and close enough to represent all the other substations.</p> <p>One site visit is issued for all the sites but Bidders MUST visit the sites and sign on the site visit register.</p> <p>Kawi is where we have our head offices.</p>
